

Stream Connectivity

The UK's most connected network

We offer the UK's most connected network. Our wholesale full-fibre network connects to all the major UK full fibre providers, LLU, carrier networks and mobile providers.

Times are changing... keep up

As you are no doubt aware, networks are changing fast. And with public and private investment in all new full fibre networks, new opportunities are popping up all over the country. Exciting times, but you may find yourself dealing with multiple providers to stitch together a workable network for your customers. Full Fibre in Falmouth to LLU in Luton – you get the idea and it soon gets very complicated.

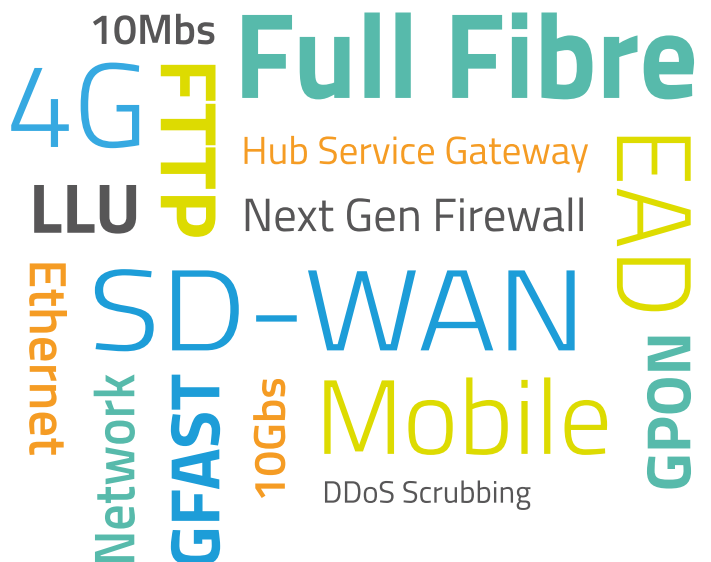

Keeping it simple

With Stream, you can simplify everything. We connect the networks you need together, so you only need to come to us.

And when you deal with us, you will have full access to our Cascade portal and easily view and quote on a range of products from all the latest full fibre networks, the leading LLU providers, network carriers and mobile operators.

The right connectivity... right now

We ensure that, whatever the connection method, it is controlled and connected to our purpose-built, always-on, Juniper Network. It is a network that also supports software defined networking – ensuring flexibility and control for all our partners and all their connections.

Stream Connectivity

The UK's most connected network

- **Unparalleled network coverage** – Best UK coverage, from a single provider.
- **Purpose-built network** – Juniper software defined fibre network and SD-WAN technology cover a wide range of full fibre bandwidths and put you in control of your customers' networks.
- **Superfast Stream** – FTTP, GPON, G-Fast, Mobile Broadband and Fibre Ethernet services provide speeds from 10 Mbs to 10 Gbs.
- **Vetted service levels** – We only connect with providers that offer a four-hour-to-fix SLA, ensuring you the best possible service.
- **Stream support** – UK-based technical support and Cascade portal provide 24x7x365 real-time access to network monitoring, security tools and bandwidth statistics.
- **DDoS protection** – Distributed Denial of Service (DDoS) Scrubbing service providing 24x7x365 real-time protection against DDoS attacks.

About Stream

Stream has been built for business, enabling our channel partners to leverage the power of our unrivalled network and cloud services.

Our purpose-built Juniper network and multi-tenant SD-WAN infrastructure allows our partners to take complete control of their customers' networks. And our highly resilient Stream Cloud virtual datacentre provides high availability cloud, secure internet transit and same day mobile connectivity. Our partner portal, Cascade enables partners to serve their customers with online ordering and full technical diagnostics of our complete range of services from full fibre broadband and fibre ethernet to cloud servers and mobile broadband.

And finally, our team of dedicated partner managers and expert technical support staff are on hand to provide friendly, straight-forward support.

If you are building business, we are building partners.
